100 Days of DevOps Challenge

Day 25 : Git Merge Branches

Name: Monisha J R

Department: CSE

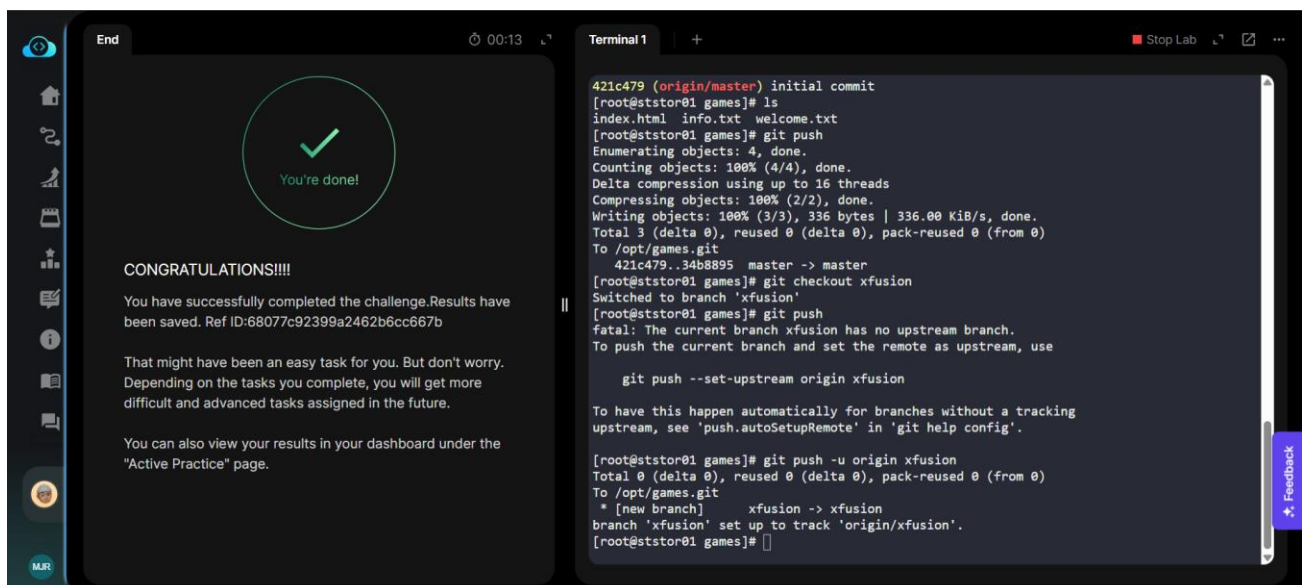

Git Merge Branches

Objective :

The objective of this task is to create a new Git branch, add a file to it, commit the changes, and then merge that branch into the master branch before pushing both branches to the remote repository.

Steps Performed :

1. Create a new branch named **nautilus** from the **/usr/src/kodekloudrepos/games** repository.
2. Copy the **/tmp/index.html** file into the repository.
3. Add and commit the new file to the **xfusion** branch.
4. Merge the **xfusion** branch into the master branch.
5. Push the changes for both branches to the origin.

Congrats!

You have completed the task successfully.
